PROFESSIONAL SUMMARY

Senior Software Engineer with 8+ years of experience building enterprise applications across Singapore and Sri Lanka, specializing in React.js, TypeScript, and modern frontend engineering. Strong experience designing and developing scalable micro-frontend applications for banking and enterprise platforms using React, Redux, Webpack Module Federation, and Spring Boot integrations.

Worked on large-scale systems at DBS Bank, GIC, and EMC Singapore, contributing to frontend modernization, React 18 migrations, enterprise integrations, CI/CD optimization, and application performance improvements. Experienced in collaborating with cross-functional teams across multiple countries to deliver scalable and maintainable solutions in Agile environments.

In addition to frontend development, experienced in backend technologies including Java, Spring Boot, Scala, and Node.js, with hands-on exposure to REST/SOAP services, microservices, Oracle/PostgreSQL databases, and cloud-based workflows.

CORE SKILLS

React.js • TypeScript • JavaScript • Java • Spring Boot • Redux Toolkit • Redux Saga • Redux Thunk • Micro Frontends • Microservices • Webpack Module Federation • React Hooks • Next.js • Node.js • Scala • REST APIs • CI/CD • OpenShift • Jenkins • Jest • React Testing Library • PostgreSQL • Oracle • Agile/Scrum

EXPERIENCE SUMMARY

Senior Software Engineer - Oct 2025 – Dec 2025 Percept Solutions Pte Ltd - Singapore (EMC - https://www.home.emcsg.com/)
Senior Software Engineer - Apr 2022 – Sep 2025 Technopals Pte Ltd - Singapore (GIC Singapore Apr 2022- Sep 2022, DBS Bank Ltd Sep 2022 - Sep 2025)
Senior Software Engineer - July 2021 – Apr 2022 IdeaBits Lanka Pvt Ltd - Sri Lanka
Senior Software Engineer - Jan 2021 – Aug 2021 Creative Technology Solutions Pvt Ltd – Sri Lanka
Software Engineer - Nov 2018 – Dec 2020 Creative Technology Solutions Pvt Ltd – Sri Lanka
Software Engineer - Feb 2018 – Sep 2018 Hybriteq Pvt Ltd – Sri Lanka.

WORK EXPERIENCE

Senior Software Engineer - EMC, Singapore | 2025 Oct 22 - 2025 Dec 31 | Technopals & Percept

TPC Project

Summary

Worked on EMC's core market systems supporting Singapore's wholesale electricity market, contributing to Java-based REST/SOAP services, Oracle database components, and regulatory document processing workflows while ensuring system reliability and compliance with market rules.

Responsibilities

- Built and maintained Java-based SOAP and REST services supporting Singapore's wholesale electricity market operations.
- Built and enhanced REST APIs for internal and external market participant integrations.
- Performed Oracle database development including complex SQL queries, stored procedures, performance tuning, and data validation.
- Worked with XML, XSLT, and XStream for message transformation and document generation for market communications.
- Utilized WinSCP and PuTTY for secure file transfers, server access, log retrieval, and deployment support.
- Worked on a mixed front-end code base involving Angular 10+ and Vue JS supporting feature enhancements and legacy components during transition phases.

Technologies

- Java 17, Java 21, REST, SOAP, Oracle, XML, XSLT, XStream, Angular, Vue.js, WinSCP, PuTTY

Senior Software Engineer - DBS Bank, Singapore | 2022 Sep 22 - 2025 Sep 22 | Technopals

RESS & EQTP projects

Summary

- Migration of AS/400 legacy systems into modern React micro-frontend and Spring Boot applications - RESS
- The EQTP project was part of DBS's initiative to modernize its equities and trading platforms across Singapore, Hong Kong and Taiwan
 - Modernization of equities and trading platforms by converting legacy .NET applications into React micro-frontends and integrating with Spring Boot backend services.

Responsibilities

- Designed and implemented scalable React.js and TypeScript UI modules for enterprise banking and equities trading platforms.
- Implemented micro-frontends with Module Federation for scalable deployments.
- Refactored large React codebases improving usability and maintainability.

- Migrated React applications to React 18, leveraging new features including concurrent rendering, automatic batching, and improved hooks performance
- Implemented React 18 patterns including useTransition and useDeferredValue for optimized user experience
- Designed and implemented Spring Boot REST APIs for business features and cross-system integrations.
- Maintained CI/CD pipelines and code quality tools, addressing exploitable issues.
- Orchestrated deployment of microservices and Module Federation-based micro-frontends on OpenShift (OCP) for scalable, independent releases
- Resolved Nexus scan vulnerabilities by analyzing dependency risks, upgrading insecure libraries, and refactoring code to meet enterprise security compliance standards.
- Implemented unit tests with Jest and React Testing Library, achieving over 80% test coverage and significantly reducing defects in production.
- Collaborated with stakeholders across Singapore, Hong Kong, and Taiwan to deliver scalable enterprise banking solutions.

Technologies

- React.js, TypeScript, Java, Spring Boot, Redux Toolkit, Redux Saga, Redux Thunk, REST, OpenShift, Jenkins, Jest, React Testing Library, Webpack Module Federation, PostgreSQL, Storybook, Styled Components

Senior Software Engineer - GIC Pvt Ltd, Singapore | 2022 April 18 - 2022 Sep 02 |

Technopals

Narnia & Arena projects

Summary

- Refactored large-scale React codebases, improving application usability and maintainability.
- Improved performance, usability, and maintainability of enterprise React applications used by analysts and business stakeholders.
- Delivered data-driven features supporting analysts and business stakeholders.

Responsibilities

- Refactored React applications from class-based components to functional components with Hooks, improving code readability, maintainability, and performance.
- Implemented advanced workflow and data presentation features using modern UI component libraries.
- Implemented unit testing with Jest and React Testing Library, achieving improved test coverage and reduced production issues.
- Built Python Django services and SQLite-based analytics modules supporting internal business workflows.
- Collaborated with analysts and stakeholders to align features with business workflows.

Technologies

- React.js, Redux, REST, Python Django, SQLite, Jest, React Testing Library, Storybook, Styled Components

Senior Software Engineer – IdeaBits Lanka Pvt Ltd, Sri Lanka | 2021 July 26 - 2022 Apr 11

Shopper Media Middleware & MVP projects

Summary

- Worked on middleware and enterprise solutions for international clients, focusing on full-stack development.
- Delivered projects with Australian clients, ensuring smooth integration of advertising and content management platforms.
- Built MVP applications using Next.js and React.js for European clients, ensuring rapid prototyping and development.
- Worked closely with stakeholders to translate business requirements into scalable technical solutions.

Responsibilities

- Built Node.js /Express middleware to synchronize BroadSign(Windows) and Ayuda(Web) advertising platforms for Australian clients.
- Built scalable workflow orchestration solutions using AWS Step Functions and AWS Lambda.
- Designed and maintained PostgreSQL databases with Sequelize ORM.
- Implemented Next.js and React.js MVP applications for European clients, enabling quick product validation.
- Wrote unit tests with Jest to ensure reliability and maintainability of middleware solutions.
- Collaborated with international stakeholders to align business requirements with technical delivery.

Technologies

- Next.js, React.js, Node.js, Express, PostgreSQL, Sequelize, AWS Lambda, AWS Step Functions, Jest, React Testing Library, Storybook, Styled Components

Senior Software Engineer/ Software Engineer – Creative Technology Solutions, Sri Lanka 2018 Nov 01 - 2021 Aug 16

Pagero AB - Sweden

Summary

- Developed and maintained distributed microservices for e-invoicing and freight solutions used by international clients.
- Worked as a full-stack React and Scala developer with strong backend involvement in enterprise-grade systems.
- Contributed to product stability, CI/CD pipelines, and production support for global operations.

Responsibilities

- Architected Invoice Audit & Validation services to support international e-invoicing compliance requirements.
- Containerized applications using Docker, enabling consistent environments and smoother deployments.
- Built React-based UIs for customer-facing modules, improving usability and accessibility.
- Built and optimized Scala and Java microservices integrated with PostgreSQL databases.
- Integrated RabbitMQ messaging for asynchronous event-driven workflows.

- Supported CI/CD pipelines (GoCD, Jenkins) to streamline deployments.
- Provided 3rd-line production support to resolve live issues, ensuring minimal downtime.
- Mentored junior engineers and conducted knowledge transfer (KT) sessions.

Technologies

- React.js, Scala, Java, Spring Boot, PostgreSQL, RabbitMQ, Docker, GoCD, Jenkins, Microservices, Storybook, Styled Components

ACADEMIC QUALIFICATION

2015 Feb -2018 Mar Sri Lanka	Bachelor of Science in Computer Science University of Colombo
------------------------------------	---

CERTIFICATIONS

- LinkedIn Learning – Building RESTful APIs with Node.js and Express
